

MC110 Intro to Comp.

Assignment 7 – Music as Process

Your assignment is to think up a process that can be used to generate musical material, and then set it in motion. Your process may generate a complete piece, or just some material that could be used in a piece, such as rhythmic patterns or pitch material. You may write out the results in conventional notation, or record it to CD, but in either case, I would like a written explanation of how the process works.
